

SAI RAMYA LINGA

<https://github.com/sairamyalinga> | sairamyalinga@gmail.com | <https://linkedin.com/in/sairamyalinga>

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Go, C++, SQL, HTML, CSS.

Frameworks & Libraries: Node.js, React JS, FastAPI, Django, D3.js, NumPy, Matplotlib, OpenCV.

Tools & Technologies: Git, Docker, AWS, Nginx, MongoDB, NPM, Oracle Integration Cloud Services (OIC), SOA.

PROFESSIONAL EXPERIENCE

NVIDIA

Mar 2026 – Present

Software Engineer | Tech Stack: GoLang, Python, Kubernetes, Slurm, Terraform

Seattle, United States

- Building automated health validation framework for a data center platform, running diagnostic checks across large-scale GPU clusters to detect and isolate unhealthy nodes.

Amazon

Jan 2025 – Mar 2026

Software Engineer | Tech Stack: TypeScript, AWS CDK

Seattle, United States

- Built real-time infrastructure for ML-based customer routing system, enriching the contact events with 100+ contextual signals to improve routing accuracy.
- Developed monitoring and testing infrastructure that simplifies integration with our system for partner teams.
- Executed database migration managing billions of records to achieve compliance requirements with zero-downtime.

InternPro.AI

Jun 2024 – Dec 2024

Software Engineer | Tech Stack: Python, FastAPI, TypeScript, React, AWS.

Tempe, United States

- Designed and developed key features for an internship matching platform, including the signup page, profile pages, text editor, and custom ag-grid tables, enabling partnerships with **250+ companies**.
- Built LLM-powered features, including autofill suggestions and matching scores between job descriptions and resumes, helping connect over **1,900 students** with internship opportunities.
- Improved UI/UX of the key web application components, achieving a **25%** boost in user engagement.

Tata Consultancy Services

Jul 2021 – Jun 2022

Software Engineer | Tech Stack: Oracle Integration Cloud Services (OIC), PL/SQL, JavaScript.

Hyderabad, India

- Architected and deployed OIC integrations achieving an **80%** improvement in software stability.
- Optimized data flow and processing within Oracle Database through PL/SQL integration in OIC.
- Troubleshoot and fixed functional issues within Visual Builder Cloud Services screens using JavaScript and HTML, ensuring a seamless user experience for client applications.

EDUCATION

Master of Science in Computer Engineering

May 2024

Arizona State University | Arizona, US

Coursework: Cloud Computing, Data Visualization, Distributed Database Systems, Statistical Machine Learning.

Bachelor of Technology in Electronics and Communication Engineering

Jun 2021

Shri Vishnu Engineering College for Women | Andhra Pradesh, India

PROJECTS

Serendip: Text Topic Modeling & Visualization | Python, TypeScript, React.js, D3.js | <https://serendip.vercel.app/>

- Developed a tool to analyze subreddit text corpora and identify topic-document relationships using NLP-based topic modeling with BERTopic, featuring six interactive visualizations.

Image Prediction Application | AWS, Go, Python, Docker

- Built a multi-tier application to identify person details from images using AWS services like EC2, Lambda, S3, DynamoDB, SQS, CloudWatch processing **100 images in 5 minutes** with dynamic scaling policies for efficient concurrent processing.

URL Shortener Service | Go, React.js, MongoDB, Docker | <https://github.com/sairamyalinga/url-shortener-react-go>

- Devised a scalable URL shortener service with RESTful APIs, secure URL validation, unique short ID generation, JWT-based user authentication, and efficient URL management using Go, React, MongoDB and Docker.

EXTRACURRICULAR ACTIVITIES

- Served as a Graduate Service Assistant, assisting with course-related inquiries, overseeing 65 students at ASU.
- Led a team of six in developing a Face Object Recognizer for visually challenged people, and was shortlisted for the **semi-finals** in the Indian Innovation Challenge Design Contest (IICDC) out of 300 participants.
